This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

First Seal.

5074. [14th cent.] Red: fine. Cut from a charter bearing date A.D. 1544. 2¼ in. [xxxvi. 41.]

This design appears to have been the work of the goldsmith who executed some of the great seals of Edward III. and Richard II. See Nos. 231, etc. Stow, *Survey of London* (Candlewick Ward), p. 237, ed. 1933, states that this seal was made in A.D. 1380.

In a central niche of three bays (the two side bays richly canopied, the middle bay groined and supporting a smaller niche in the upper part), on the l. St. Thomas, Archbishop of Canterbury, with mitre and pall, seated on a bench, lifting up the r. h. in benediction, in the l. h. a long crozier; on the r. St. Paul, holding in the r. h. a drawn sword, in the l. h. a book, similarly seated on a bench, beneath his feet a prostrate figure of Elymas the sorcerer. In the smaller niche overhead, the Virgin, crowned, seated, holding the Child standing on her l. knee, in her r. h. a book. On each side of this central niche a canopied niche, containing in a balcony a half-length man-at-arms with low cap, holding a mace or club. Above, on each side on a pedestal or bracket, an angel kneeling, with wings expanded, hands in prayer. In base, in a compartment with flat head, a shield of arms: CITY OF LONDON, as in No. 5073, supported by two demi-lions, rampant guardant, each under a round-headed arch. At the sides outside all, tabernacle work.

Second state of the First Seal.

5079. Sulph. cast from the matrix. [lxvii. 20.]

This is from the same matrix as the preceding seal, No. 5074, but shows the greatly worn condition of the matrix, which appears in some places to have been retouched by the goldsmith.

Later Seal, or
Design for a new Seal.

5080. [17th cent.] Sulph. cast from the matrix. 2½ in. [lxviii. 21.]

This is a design which owes its origin to the previous seal, No. 5075, but has been executed with a view to supersede the Gothic architecture by substituting the Italian style. In the centre in a niche with three round-headed arches, on the l. St. Thomas the Archbishop seated with mitre and long cross or crozier, on the r. a king seated, crowned, with drawn sword in the r. h., and orb and cross in the l. h., betw. the two figures a vase. Above, in smaller niche, with double arch, the Virgin and Child; smaller niche on each side, and an angel on each side outside the niches. At each side of the central niche, a niche with round-headed arch containing a man-at-arms, half-length. In base, a shield of arms as before, supported by two sea-lions, crowned, each in a niche with round-headed arch. Under the men-at-arms on each side a shield of arms: l., two lions passant guardant in pale, perhaps for one of the Mayors, or for NORMANDY; r., ENGLAND.

℟. An elaborate design representing on waves in base a tower of two storeys. In the lower storey, the pointed arched doorway is open and contains an ecclesiastic, seated, to the r. and a suppliant, with hands uplifted in prayer before him, on the r. This subject appears to have been impressed deeply by a moveable and separate part of the matrix. Above, in the second storey, a narrow rectangular window, also apparently impressed by a moveable matrix, a saint standing full-length, holding a palm-branch. Over this, an angular embattled tower, on which is a banner-flag charged with three chevrons, and also a watchman, half-length to the l., holding a lantern.

Before him, on the l. in the field a shield of arms of ENGLAND. On each side of this tower, in base, are houses representing the town of Winchelsea. On the l. h. side of the tower two gothic niches with pointed arches, canopies pinnacled and crocketed, on that on the l. a bird, behind the other a tall spire, pinnacled and crocketed, and topped with a cross. The two niches contain on the r. St. GILES, seated to the l., with a fawn leaping up to him, and a tree, on the l. a huntsman with a bow in the l. and a horn in the r. h., and a tree, from moveable matrices. On the r. h. side of the tower three gothic niches with pointed arches, canopies pinnacled and crocketed, and behind the middle niche a tall spire. These three niches contain a representation of THOMAS BECKET'S martyrdom. This also appears to be from a moveable matrix. Cf. Nos. 1373, 1374 and 1377 in Vol. I., Plate ix.; 2688, 2799, and 4061.

ADOMARVS DE VALENCIA · COMES · PEMBROCHIE DNS WEYS ET DE MONTINIACO.

℞. A shield of arms: burelé (here represented by seven bars), an orle of nine martlets, AYMER DE VALENCE. Another seal, quoted and drawn by Doyle (*Offic. Baron.*, vol. iii. p. 10), gives six bars and thirteen martlets, but the Earl's signet seal in Add. ch. 19,835, which will be described further on in this catalogue, corresponds with this *rev.*

The shield is suspended by a strap to a tree, and betw. two other trees of conventional form, within a finely carved gothic rosace of eight semi-circular cusps, trefoiled, and ornamented with counter-sunk trefoils betw. triplets of pellets in the spandrils.
